OBJECTIVE

To leverage my skills and knowledge effectively in a dynamic organization that fosters growth and offers opportunities for learning. Seeking a role where I can contribute positively, learn from experienced professionals, and make meaningful contributions to the organization's objectives.

EDUCATION

- **Master of Computer Applications (MCA)** from Visvesvaraya Technological University (VTU), Belagavi. (Pursuing — Expected Graduation: 2026)
- **Bachelor of Computer Applications (BCA)** with CGPA-8.24/10 in 2024 from Gulbarga University.
- **Pre-University Course** with 65.55% in 2021 from Department of Pre-University Education Karnataka.
- **S.S.L.C** with 74.56% in 2019 from Karnataka Secondary Education Examination Board.

TECHNICAL SKILLS

- **Programming Languages:** C, Java, C#, Python
- **Web Technologies:** HTML, CSS, Bootstrap, JavaScript, MySQL
- **Frameworks / Libraries:** React.js, AngularJS
- **Tools & IDEs:** Visual Studio Code, Eclipse, IntelliJ IDEA, GitHub

PROJECTS

Bean & Bloom Café | HTML5, CSS3, JavaScript

- Built a fully responsive café website with menu display, gallery, contact details, and reservation form for online table booking.
- Designed an intuitive and engaging UI with smooth navigation to enhance user experience and accessibility across devices.

Hotel Management System | Java, Swing, JDBC, MySQL

- Developed a desktop-based hotel management application enabling customer registration, room booking, and check-in/check-out functionalities.
- Integrated MySQL database via JDBC for real-time data management of rooms, customers, and employees.
- Designed an interactive GUI using Java Swing to improve operational efficiency and reduce manual work.

ShopWave | JSP, Servlet, HTML5, CSS3, JavaScript, Tomcat Server, MySQL.

- Developed **ShopWave**, an online shopping web application using **JSP, Servlets, HTML, CSS, JavaScript**, and **Tomcat Server**, enabling product browsing, cart management, and secure user login functionality.
- Implemented **MySQL database integration** for product inventory, user authentication, and order handling, ensuring efficient data storage and smooth transaction flow.

COURSE WORK

Data Structures Object-Oriented Programming DBMS Operating Systems Web Development
